CAPABILITY STATEMENT

COMPANY OVERVIEW

Texo LLC is a systems engineering, AI integration and accelerator studio. Texo takes the systems an organization already runs, puts one reliable record underneath them, and builds the applications, automations and AI tools on top, deployed in the client's environment and owned by the client. Each new tool builds on a shared foundation, so programs grow by adding capability rather than vendors. Texo's partners have led technology at the LA Clippers, United Talent Agency and Defy Mortgage, and built the acquisition systems at institutional real estate firms.

PAST PERFORMANCE

- **Apple: outside engineering team for an internal tools program.** Built a ratings-and-reviews intelligence tool, a launch hub joining marketing, sales and sentiment data, a deck generator, brand-asset search and a brand-compliant image engine on Apple's infrastructure, under its security review, on one shared codebase. **Result:** the reviews tool replaced an outside vendor; the engagement has been extended twice.
- **Development and owner-representation firm: one record behind every project.** A principal's dashboard and project managers' views on one record, fed by an assistant that proposes updates for a named person to approve, with owner portals, monthly reports and line-by-line bid leveling. **Result:** fifteen owner portals live; 117 approved changes in the assistant's first ten runs; bid analyses cut from 5 to 8 hours to minutes.
- **InSite Property Group: acquisition sourcing system** (in-house system, built by Texo's founder). On-market screening, off-market ownership identification and broker cultivation across 38 target metros. **Result:** screening moved to analysts, producing a sustained on- and off-market pipeline.
- **Ares Management: AI investment committee memo system** (in-house system, built by Texo's founder). Replaced a five-day, roughly 20 team-hour PowerPoint cycle for the firm's 33-page memo. **Result:** produced at firm format in under an hour.
- **Plaintiff litigation firm: medical-records review for trial.** Reads, indexes and summarizes charts past 12,000 pages and answers questions; every citation carries the page, Bates stamp and quoted text, verified word for word. **Result:** in production with 39 charts, measured against the firm's own answer key.
- **Environmental compliance firm: inspection intake across industrial facilities.** Reads forms from an inbox and a compliance portal, resolves each to its facility and alerts on reported spills. **Result:** in parallel testing, 25 of 35 records matched staff entries exactly; the other 10 were correct by design.

CORE COMPETENCIES

Systems Engineering and Integration

- Architecture across systems of record
- ERP, CRM, Microsoft 365, Procore APIs
- One data model, no new silos

AI Integration

- LLMs and AI agents in production
- Drafting, research and triage
- Answers cited to the source page

Data Engineering and Analytics

- Pipelines, data models, migration
- Legacy and SAS workloads to cloud
- Dashboards and decision views

Workflow Automation and Rapid Application Delivery

- Reporting, intake and routing
- First tool in weeks, shared codebase
- Parallel validation before cutover
